Opera 3 Data Provisioning Service

Make the most of your Payroll system

Opera 3 Payroll offers HMRC Online Services which allow the system to communicate effectively with HMRC. It caters for all RTI type submissions and interacts with HMRC's Data Provisioning Service (DPS) to electronically deliver tax code data referred to as P6 and P9 data from the Government Gateway (Gov-G) DPS for their employees. It caters for secure and automatic retrieval of employee's tax code where new codes can be instantly applied.

### Take the pain out of P6, P6b & P9 updates

The Scheduler (2.21.00) and the Opera 3 Payroll application (2.82.00) have been enhanced to use HMRC's Data Provisioning Service (DPS) to electronically deliver notices to employers. This service caters for the secure retrieval of structured messages that are machine readable and can now be easily processed within Opera 3.

This new functionality will allow Payroll users of Opera 3 to electronically download tax code data (P6 and P9) from the (Gov-G) DPS for their employees.

The Government Gateway Users form (accessed from the Payroll - Maintenance menu) allows the creation and maintenance of multiple sets of Gov-G user credentials.

You can use these credentials to connect to HMRC and enable Data Provisioning Services.

Use the Data Provisioning Service Download wizard (accessed from the Payroll & HR- HMRC Online Services menu) to download, apply and update employee tax code changes from HMRC's data provisioning service.

Update notifications are seen and reported during calculation and historical updates may be accessed via the employee's DPS updates history view.
