

Pegasus CIS 5 – Web Apps

Controlling your costing on-site with a comprehensive set of Web Apps

The aim of our Web Apps is to ensure that managing your field operations and keeping your workforce focussed, informed and compliant is a challenge that can simply be achieved.

Replace paper trails, email chains, messaging systems and phone calls with one end-to-end set of Web Apps for real-time job, document, and workflow management. Ideal for those wishing to use technology to streamline operations, improve compliance, and stay focused on getting the job done.

This breaks down into a number of specific areas within Pegasus CIS, together with related activities for that specific Web App.

Purchasing – Web App

The Purchasing Web App is designed for full control of your purchasing needs, either on site or at your warehouse & stores. Raise purchase orders, issue them & record those receipts, it even allows you to return them back to a supplier if they are incorrect.

 Purchase Orders	Raise supplier purchase orders for jobs, stock, plant or overheads
 Receive Goods	Record goods received from a supplier
 Return Goods	Record goods returned back to a supplier

Stock Control – Web App

Full control of your stock records from enquiries through to posting to your jobs or transferring between warehouses and sites.

 Stock Issues	Issue stock from your stores to a job
 Stock Returns	Return unused goods from a job and move it back into stock
 Stock Enquiry	View stock levels & stock detail
 Stock Transfers	Allows users to enter Stock Transfers
 Stock Adjustments	Adjust the quantity held in stock at a warehouse and/or bin location

Plant Hire – Web App

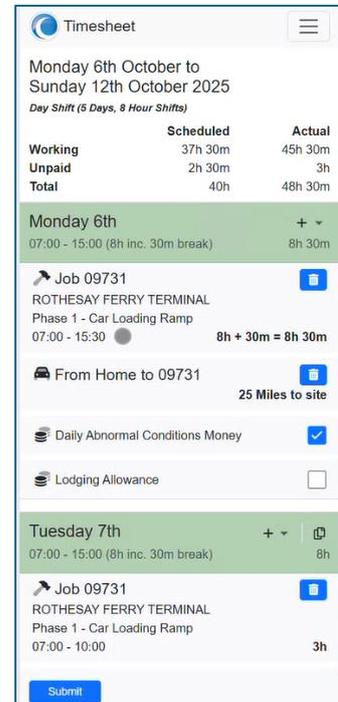

Control of plant receipts and returns of plant that are on site.

 Receive Plant	Record plant received from a supplier as on-hire
 Return Plant	Record plant returned back to a supplier as off-hire

Employee Timesheets – Web App

Empower your team to enter their timesheets directly into their mobile devices, allow these timesheets to be approved. Once approved they can be posted into your Pegasus CIS 5 system for those costs to be allocated to your jobs and posted into the Payroll for your employees to be paid. A fully integrated solution.

- Simple web-based timesheet/expenses entry system for your workers to enter their activities
- Web based multi-level approvals system for your managers to verify those timesheets
- Automatic backend processing for hours, overtime, allowances to convert to pay elements for posting to payroll
- Configuration of user groups, shifts, rates, overtime rules, allowances, travel expenses, expense types & limits, etc. is done via the desktop program accessed by your supervisors
- Implements most of the common union national agreements out of the box (NAECI, BESA, JIB, etc.)

 Timesheets	Enter the time worked, sickness, holidays, travel, allowances & expenses
 Authorise Timesheets	Authorise timesheets & expenses for employees under your supervision. Multi-level approvals allow for a tiered process to approve & post these costs to your jobs and Payroll.

Purchasing Authorisation – Web App

Remote authorisation processes allow for an agile approach to running a business, especially where key decision makers are not necessarily office based. Using technology can allow these decision makers to monitor the business and authorise transactions while operating outside the normal office environment. Ideal for many of the modern companies that operate in the construction eco-system within the UK.

 Purchase Order Authorisation	Purchase Orders that are awaiting authorisation
 Purchase Invoice Authorisation	Purchase Invoices that are awaiting authorisation
 Purchase Credit Authorisation	Purchase Credits that are awaiting authorisation

In many cases the same control is required over your subcontractors, remote authorisation of subcontractor documents is also provided within this Web App.

 Subcontractor Order Authorisation	Subcontractor Orders that are awaiting authorisation
 Subcontractor Invoice Authorisation	Subcontractor Invoices that are awaiting authorisation
 Subcontractor Certificate Authorisation	Subcontractor Certificates that are awaiting authorisation

Surpass your limits with tools that will help you drive success

Pegasus CIS 5 Web Apps link your office and field teams using our user-friendly desktop dashboard and mobile app utilities, enabling unparalleled real-time oversight at every stage in your project's lifecycle.
